1 Introduction

There has always been the question of Vim vs Emacs. The question is very similar to two other famous questions: “Coke vs Pepsi?” and “Ford vs Chevy?”. The two examples have no clear answer. In any question of Vim vs Emacs, the question need not continue after the third letter.

2 Vim

Vim can be used to write code in any language. An example Vim instance is shown in Figure 1.

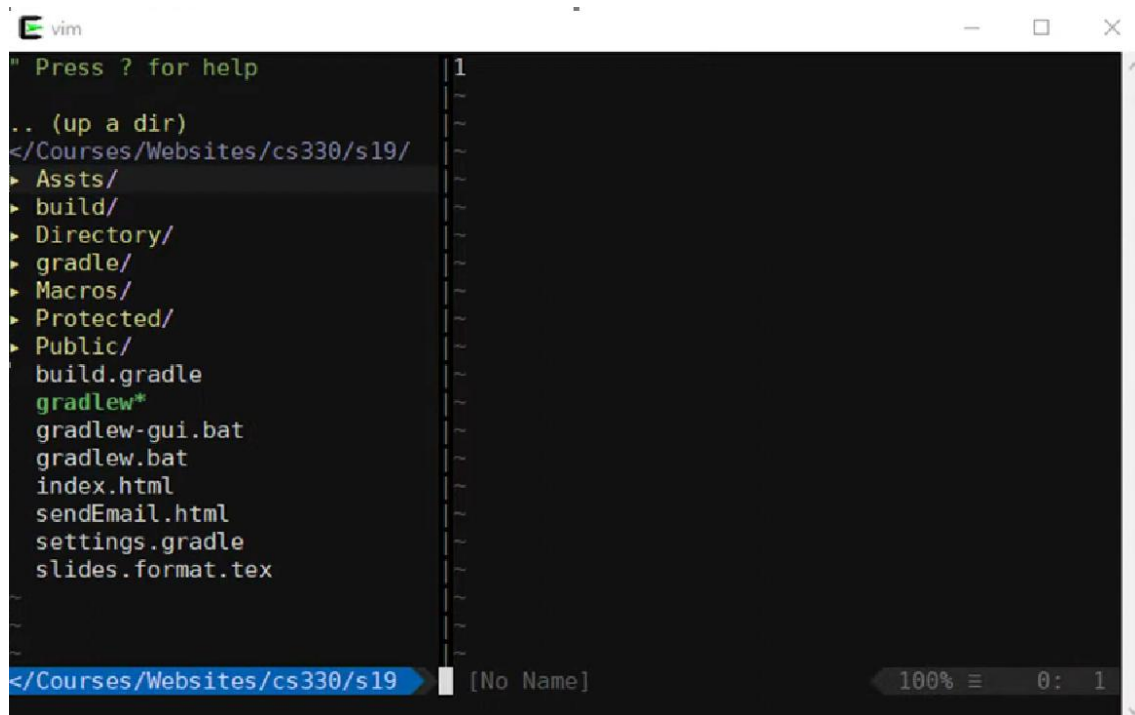

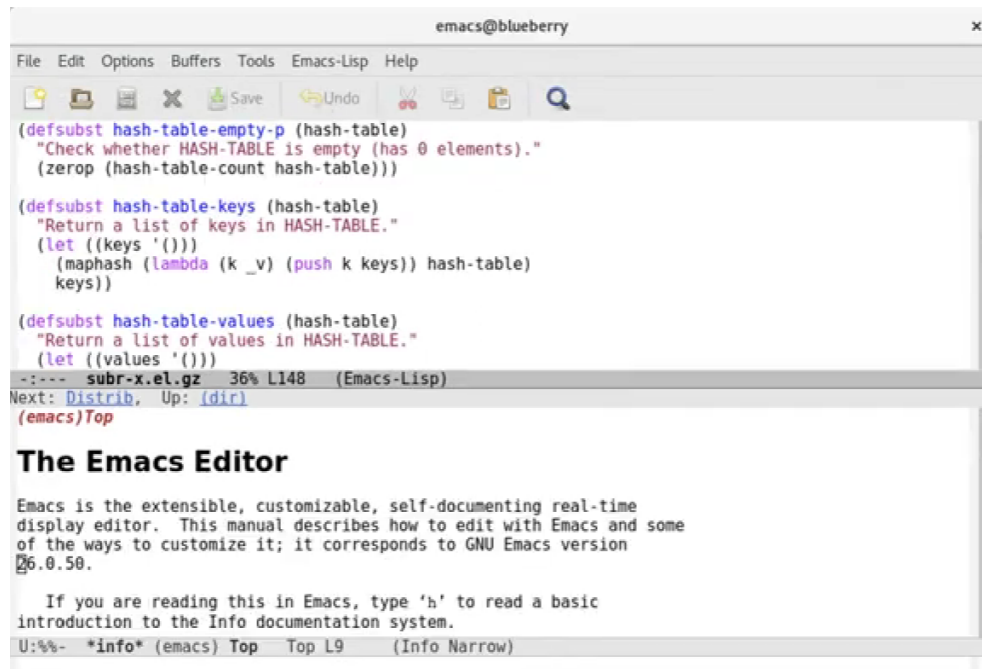

Figure 1: Vim with the NerdTree Plugin

3 Emacs

Do not use Emacs. Emacs is shown in **Error! Reference source not found.**

[This space intentionally left blank]

3.1 Emacs in Detail

Emacs exists.

3.2 Why Emacs should Not be Used

Emacs is not Vim. Quode rat demonstrandum.

4 Conclusion... Vim

Revisit Section 3.2.
